RACE PILOT

WITH AN ENGINE BY ZENITH

MECHANICAL MODULE

- Movement by Zenith, Caliber 685
- Automatic movement with 38 jewels
- 28 800 bph
- Power Reserve 50 h
- Dial made of 29 individually manufactured pieces, decorated with Côtes de Genève and Clous de Paris
- Skeletonized hands and applied indexes with Superluminova
- Case and bezel made of titanium with a black DLC treatment

FUNCTIONS

- Hours, minutes, subsidiary second
- 12-hour display
- Power Reserve Indicator
- Sub second dial
- Date function

The mechanical module of the Halda Race Pilot is made of the best of two worlds; it has a design with many details where inspiration has been drawn from the world of racing and it is equipped with one of the best engines one can find – a movement from one of the most highly regarded Swiss mechanical movement producers – Zenith. The movement is self-winding featuring a Power Reserve indicator and decorated with Côtes de Genève. The rotor is specially designed in heavy metal etched with Halda Race Pilot and decorated with both Côtes de Genève and Clous de Paris.

The Race Pilot is available with three different dials; Silver Geneva, Gun Metal or Black Luminova. The dial itself is engine turned and manufactured out of 29 individually manufactured pieces. For visual functionality, the hands and hour indicators of the module has been applied with Superluminova. The crown is made of stainless steel with anodized red centerpiece in aluminum. This module is designed to meet the high demands of connoisseurs with exceptional taste in style and fine mechanics. For those moments aside the race track, the Mechanical Module completes the Halda Race Pilot perfectly.

TECHNICAL DATA

MECHANICAL MOVEMENT

- Movement by Zenith, Caliber 685
- Self-winding mechanism (Automatic)
- 38 jewels
- 28,800 bph
- Rhodanized and decorated with Côtes de Genève, Clous de Paris, Colimaçonnage and Perlage
- Specially designed rotor in heavy metal etched with Halda Race Pilot and decorated with Côtes de Genève and Clous de Paris
- Power Reserve 50 h

CASE

- Case and bezel made of titanium with a black DLC treatment
- Case-back in stainless steel, fastened with eight screws
- Domed sapphire crystal, double anti-reflex coated
- Domed sapphire case-back with magnifying effect
- Crown in stainless steel with anodized red center in aluminum
- Water-resistant according to ISO 22810 (NIHS 92-20)
- Pressure resistant to 5 bar

FUNCTIONS

- Hours, minutes, subsidiary second
- 12-hour display
- Date display
- Power Reserve Indicator

DIMENSIONS

- Case diameter 45 mm excluding crown
- Band lug width 22 mm
- Case thickness 16,9
