RACE PILOT

THE FIRST REAL RACING WATCH

RACE MODULE

- Electronic movement by Halda, Caliber HR 2012-1
- Software RP-A, RACE PILOT Version A
- Three pushers with an easy to use interface
- Integrated automatic light sensor, red indicator for night racing
- Three axis accelerometer measuring G-Force
- Race Pilot program

FUNCTIONS

- Racetrack, information of the most prestigious racetracks
- Race Chronograph, measuring speed and time 1/100
- Countdown to Race
- FIA Formula 1 Countdown
- Night Race Indicator
- Dual Time
- Week Indicator
- World Timer – the time in all countries in the world (UN)
- Alarm Clock
- Timer (24 hour)
- Perpetual Calendar
- Power Save Mode
- Battery Reserve Indicator

To meet the extreme demands incurred on and around the race track, the Race Module is equipped with sophisticated technology and advanced functions that really make a difference in professional racing. The watch has been developed in close cooperation with professional race drivers and technicians and put to extreme tests on the race tracks.

A lot of effort has been put down to create the easy to use interface of the Race module and it has been programmed with useful functions such as Countdown referring to FIA Formula 1 regulations and the Race Pilot program which gives you information of the most popular tracks in the world. The module also has an advanced racing chronograph showing lap times and even average speed, which registers the fastest lap with an accuracy down to 1/100 of a second. Based on feedback from the tests, the Halda team has fine-tuned the Race Module to perfection, which illustrates the non-compromising quality of Halda Watch Co.

RACE MODULE TECHNICAL DATA

ELECTRONIC MOVEMENT

- Movement by Halda, Caliber HR 2012-1
- Software RP-A, RACE PILOT Version A
- Low power consumption microprocessor
- Battery lifetime – minimum 2 years
- Pre heated and selected quartz crystal
- Custom designed LCD display and LED backlight

CASE

- Case and bezel made of titanium with black DLC treatment
- Case-back in stainless steel, fastened with eight screws
- Push-buttons in brushed stainless steel with anodized inserts in aluminum
- Water-resistant according to ISO 22810 (NIHS 92-20)
- Pressure resistant to 5 atm

FUNCTIONS

Three pushers with an easy to use interface

RACETRACK	– Featuring information from 150 of the world's most popular racetracks
RACE CHRONOGRAPH	– Measuring lap time and average speed of two cars simultaneously with accuracy down to 1/100 of a second. Featuring indicator for night racing
COUNTDOWN TO RACE	– Time remaining to next race displayed with days, hours, minutes and seconds
FIA FORMULA 1 COUNTDOWN	– Warning system of time remaining until Formation Lap, according to the Formula 1 regulations of Fédération Internationale de l'Automobile (FIA)
DUAL TIME	– Showing local time and preferred world time as well as day, date and week Battery lifetime and software version is also visible within this function
WORLD TIMER	– UTC and DST, with ability to display time and time zone of the 193 countries connected to UN
ALARM CLOCK	– With possibility of setting the alarm to sound once, every day or weekdays
TIMER	– 24 hour timer
G-FORCE	– Three axis accelerometer measuring G-forces in three different directions
BACKLIGHT	– Controlled by an integrated automatic light sensor
ALARM	– Case-back with sound amplifying design. Alarm with a sound profile with frequencies between 2,5 – 8 kHz. Red light indicator for visual alert.
PERPETUAL CALENDAR	– Day, date, year and week indicator
POWER SAVE MODE	– With battery reserve indicator
